## CITY BUILDING: NINE PLANNING PRINCIPLES FOR THE TWENTY-FIRST CENTURY (PAPERBACK)

PRINCETON ARCHITECTURAL PRESS, United States, 2010. Paperback. Book Condition: New. 249 x 190 mm. Language: English . Brand New Book. Good city building is not created by complex statistics, functional problem solving, or any particular decision-making process. Part two translates this framework into nine best-practice principles that are common to successful, livable, urban environments: sustainability, accessibility, diversity, open space, compatibility, incentives, adaptability, density, and identity. These principles are illustrated in a global portfolio of city building projects, designed by SOM, that show how best practices have been applied successfully. Part three makes the case that, far from being the problem, cities, properly organized, can be a mechanism for sensible, sustainable uses of increasingly scarce resources. The book concludes with a call for a national...
