The mining industry in the territory of Alaska during the calendar year 1916

By Sumner Stewart Smith

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 40 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1917 Excerpt: . . . CREEK DREDGING CO. The dredge erected on Cache Creek during the past spring represents the first serious attempt at gold dredging in this part of the Territory. The bedrock includes slates, graywackes, sandstones, and shales, with occasional beds of lignite. The creek is comparatively shallow, its average depth being approximately 6 feet, so the dredge has a large hull, 87 feet long, 54 feet beam, and 7 feet deep, for shallow draft. The planks of the bottom are 4 by 12 inches, those on the sides 6 by 12 inches, and the deck 3 by 12 inches. The winch deck is 30 feet above the main deck and the pilot deck is 12 feet above this. The spuds, made of wood reinforced with steel, are 44 feet long and weigh 11 tons each. The 65 close-connected 7-foot buckets have manganese-steel lips; and although the dredge has...
